BUI THANH TAI

Senior DevOps Engineer

thanhtai18021994@gmail.com 0931994104 Da Nang, Vietnam

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6 years of experience designing, automating and operating production platforms on AWS, Kubernetes and on-premises Linux. Lead DevOps at MTL Technology, owning the platform for 20+ products: EKS, GitOps delivery (ArgoCD + Helm), CI/CD (Jenkins, GitLab CI), observability (Prometheus, Grafana, OpenSearch, OpenTelemetry), security and incident response. Sets engineering standards, leads root-cause analysis and delivers measurable gains in reliability, security, cost and delivery speed. Automates with Bash and Groovy; ships Java/Spring Boot and React/Next.js code when needed. Based in Da Nang, open to relocating to Ho Chi Minh City.

TECHNICAL SKILLS

Kubernetes & Containers: EKS, GKE, AKS, self-managed on-prem clusters; Karpenter, Helm, AWS Load Balancer Controller, RabbitMQ Operator; Docker, Docker Compose, Portainer

IaC & GitOps: Terraform, Ansible (incl. AWS SSM for Windows Server), Helm, ArgoCD, Salt Stack

CI/CD: Jenkins (shared libraries, Kubernetes/on-prem agents, Kaniko), GitLab CI, Azure DevOps, AWS CodePipeline, Nexus, JFrog, Amazon ECR

Linux & On-premises: Ubuntu, Amazon Linux, Windows Server, Nginx, SSH tunnels/bastions, GPU servers

Networking: VPC, ALB/NLB, Ingress, Route 53, CloudFront, WAF, TLS, WebRTC (LiveKit SFU, TURN)

Observability: Prometheus, Grafana, Loki, OpenTelemetry, OpenSearch/ELK, Fluent Bit, CloudWatch

Security & DevSecOps: SonarQube, Snyk, Trivy, Gitleaks, HashiCorp Vault, AWS IAM/IRSA, CVE patching

Cloud: AWS (EC2, EKS, RDS, ElastiCache, S3, OpenSearch, SQS/SNS, Kinesis, IAM), GCP (GKE, Pub/Sub), Azure (AKS), Alibaba Cloud

Data & Messaging: MySQL/MariaDB, PostgreSQL, MongoDB, MSSQL, Redis, RabbitMQ, ActiveMQ, Kafka

Scripting & Programming: Bash, Groovy, Java 17/Spring Boot, TypeScript (React, Next.js, Node.js)

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

08/2024 – Present

MTL Technology

Da Nang, Vietnam

Lead DevOps for 20+ production products (gaming, fintech/Web3, real-time AI voice, internal tools) across multiple AWS accounts, a shared EKS cluster, 100+ EC2 instances and on-premises servers; set CI/CD and GitOps standards and review infrastructure changes across teams.

- **Platform ownership:** Own the AWS platform for 20+ products: a shared EKS cluster (Karpenter, AWS Load Balancer Controller, IRSA) running 60+ services via ArgoCD and Helm; eliminated ~7-minute outages on spot reclaims and cut idle spend by retiring unused staging environments.
- **CI/CD & GitOps:** Standardised CI/CD and GitOps across 20+ repositories (Jenkins shared libraries, Kaniko, ArgoCD + Helm), incl. Windows builds of Unreal Engine game servers; cut pipeline time by up to 70% (16 min to under 5 min) and backend deploys from ~7 to under 3 minutes.

- **Incident management:** Escalation point for production incidents; led root-cause analysis and permanent fixes, e.g. capacity limits and a client busy-loop behind a live-translation outage, a crash-looping analytics server, and a database exposure recovered with zero data loss.
- **Observability:** Own the monitoring and logging stack (Prometheus under ArgoCD, Grafana, Fluent Bit, OpenSearch, Telegram alerting); restored OpenSearch health by fixing a silently failing retention policy, cutting disk use from 80% to 38% and recovery time from ~15 min to under 2 min.
- **Migrations:** Led platform migrations with rollback paths: SSO from a single EC2 host to Kubernetes (HA validated before cutover) and 4 production RDS databases to MySQL 8.4 via Blue/Green on Graviton.
- **Security:** Drive vulnerability management: patched a critical PHP RCE (CVSS 9.2) in production within a day, ran fleet-wide CVE audits, cut public S3 buckets from 15 to 2, closed internet-exposed database/admin ports, and added DNS Firewall alerting and VPC Flow Logs.
- **Data platform:** Designed and delivered a privacy-first analytics platform (PII-masked ETL, Terraform + ArgoCD): 204 tables and 22 collections replicated with zero errors, daily snapshots with a verified restore drill, and a 1,066-day backfill in under 3 hours.
- **Real-time media:** Run real-time media infrastructure: moved WebRTC voice from quota-capped LiveKit Cloud to self-hosted LiveKit (DEV and PROD), operate a live speech-translation service on EKS (streaming speech-to-text, AI agents) and hardened livestream servers against session floods.
- **Hybrid & on-prem:** Operate on-premises Ubuntu servers (Docker Compose, Portainer, PostgreSQL 17, GPU inference, Jenkins agents) and publish internal services securely via reverse SSH tunnels and an Nginx bastion; diagnosed kernel-level (RCU) stalls and network faults.
- **Internal tooling:** Built an AI-assisted operations toolkit: Claude Code with 10 MCP servers (GitLab, AWS, Grafana, OpenSearch, Jenkins, Backlog), runbook commands, a 3-tier permission model and one-command health checks across 85 DEV apps.
- **Cross-functional:** Led a CRA to Next.js 14 migration of a Web3 gaming platform; co-developed BibleQuiz, a non-profit Vietnamese Bible quiz app (Java 17/Spring Boot 3, React 18, ~370 tests).

DevOps Engineer
02/2024 – 07/2024

Rikkei Software
Da Nang, Vietnam

Set up and operated multi-environment infrastructure on on-premises servers and Alibaba Cloud for client projects.

- **SMP** · *Microservice platform · team of 70+ · Java/Python/ReactJS · on-prem + Alibaba Cloud*
  - Designed the dev/test/UAT/production deployment architecture across on-premises servers and Alibaba Cloud; provisioned on-prem Kubernetes clusters and storage providers.
  - Set up Jenkins on Kubernetes, Nexus, SonarQube, ArgoCD, Prometheus, Grafana and ELK; MongoDB replica sets on VMs, MySQL, and Alibaba ACK with GitLab CI.
  - Wrote Dockerfiles, standard Helm charts and Jenkins shared libraries used by the 70+ member team.

DevOps Engineer
12/2022 – 01/2024

Synodus
Ha Noi, Vietnam (Onsite)

DevOps for concurrent client projects in logistics, blockchain, fintech and government; owned CI/CD, cloud infrastructure (AWS, GCP, Azure) and observability.

- **XECA** · *Logistics platform · 20+ microservices for 35+ bus garages · team of 35 · GCP/GKE*
  - Provisioned GKE, Pub/Sub and MariaDB with Terraform; Jenkins on GKE with Linux/Windows agents; pipelines from code scan to ArgoCD deploy; Vault, DNS and ingress.
  - Removed performance bottlenecks: 20% performance improvement and 15% less downtime.
- **BANCA** · *Blockchain platform · 25+ microservices · team of 20 · Azure/AKS*
  - AKS and PostgreSQL Flexible Server via Terraform; ArgoCD GitOps with Vault; Helm charts and Azure DevOps pipelines with SonarQube, Snyk and image-scanning gates.
  - Enforced network policies and pod security standards for compliance; ELK plus Prometheus/Grafana.

- **CLEO** · *Fintech platform · bank/VNPAY/Momo integrations · team of 26 · AWS*
  - AWS in Terraform (EC2, ECS, Lambda, VPC, WAF) under Control Tower; CodePipeline/CodeDeploy with automated rollback; CloudWatch/CloudTrail, RDS backups, Redis, SQS/SNS.
- **DTC** · *Government · Vietnam Ministry of Finance · team of 15 · Windows/SharePoint*
  - High-availability SharePoint Server 2019 farm, SQL Server Always On and IIS; Jenkins CI/CD for .NET; backup/recovery procedures.

DevOps Engineer
01/2021 – 12/2022
FPT Software
Da Nang, Vietnam

- Automated configuration of Zookeeper, HBase, Hadoop, Tomcat, MongoDB, Elasticsearch and Filebeat with Salt Stack.
- Provisioned AWS and GCP resources with Terraform; set up and maintained Jenkins, Nexus/JFrog, SonarQube, ELK, Prometheus and Grafana.
- Automated build/test/deploy with Jenkinsfiles and wrote Helm charts for Kubernetes workloads.
- Troubleshot production issues across EKS, ECS, WAF, SQS/SNS and AWS networking; kept zero downtime through peak-hour scaling from 90 to 150+ nodes.

Software Developer
2019 – 2020
Freelance / Various Projects
Da Nang, Vietnam

- Built web applications and REST APIs (Java, Spring Boot, Angular, MySQL/PostgreSQL) and handled their deployments, which led to the move into DevOps.

EDUCATION

Bachelor of Engineering
2012 – 2017
Da Nang University of Science and Technology
Da Nang, Vietnam
