BUI THANH TAI

Senior DevOps Engineer

✉ thanhtai18021994@gmail.com · ☎ 0931994104 · Da Nang, Vietnam · github.com/taibt-devops

PROFESSIONAL SUMMARY

DevOps Engineer with 5+ years of hands-on experience managing cloud-native infrastructures on AWS and multi-cloud environments. Currently overseeing 20+ production projects on GitLab with ownership of CI/CD pipelines, Kubernetes orchestration, and observability platforms. Experienced in building EKS clusters, implementing GitOps workflows with ArgoCD, and designing OpenTelemetry-based SLO/error-budget monitoring. Familiar with integrating DevSecOps practices (SonarQube, Snyk, Trivy) into CI/CD pipelines. Proven production incident response and troubleshooting skills. Also capable of contributing to full-stack development (Java/Spring Boot, React/Next.js) when project needs arise.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, RDS, ALB, S3, CloudFront, ElastiCache, OpenSearch, SQS, SNS, WAF, IAM, CloudWatch), GCP (GKE, Pub/Sub), Azure (AKS, DevOps), Alibaba Cloud

Containers & Orchestration: Docker, Docker Compose, Kubernetes (EKS, GKE, AKS), Helm Charts

CI/CD & GitOps: Jenkins (Shared Libraries), ArgoCD, GitLab CI, AWS CodePipeline, Azure DevOps

IaC & Configuration: Terraform, Ansible, Ansible + SSM (Windows Server), Salt Stack

Observability: OpenTelemetry, Prometheus, Grafana (SLO/Error Budget, Burn Rate Alerting), ELK Stack, Loki, Fluent Bit, PostHog (Self-hosted)

Security & DevSecOps: SonarQube (SAST), Snyk (SCA), Trivy (Container Scanning), Gitleaks, HashiCorp Vault, Azure Key Vault, AWS WAF, VPC/Security Groups, OWASP Top 10 awareness

Data & Messaging: MySQL, PostgreSQL, MariaDB, MongoDB, SQL Server, Redis, OpenSearch/Elasticsearch, ActiveMQ, Kafka, AWS SQS/SNS

Languages & Frameworks: Shell/Bash, Groovy, YAML, Java 17, Spring Boot 3.x, React 18, Next.js 14, TypeScript, Vite. Artifact repositories: Nexus, JFrog, GCP Artifact Registry

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer · MTL Technology

Da Nang, Vietnam 08/2024 – Present

Lead DevOps for the organization managing 20+ active projects across GitLab, serving multiple product lines including gaming platforms, fintech, e-commerce, and internal tools.

- Manage and operate 20+ production projects on GitLab with full CI/CD pipeline ownership using Jenkins, ArgoCD, and GitLab CI across multiple AWS accounts and environments (dev/staging/production).
- Architect and maintain AWS EKS clusters with advanced networking configurations including TargetGroupBinding for NLB sharing across namespaces, auto-scaling node groups, and cost-optimized spot instance strategies.
- Design and implement comprehensive observability stack using OpenTelemetry, Prometheus, and Grafana with SLO/error-budget dashboards and burn-rate alerting for proactive incident detection.
- Deploy and manage self-hosted services: PostHog (analytics with S3/MinIO storage), ActiveMQ, Redis clusters, OpenSearch with custom ingest pipelines and highlighting configurations.
- Identified and remediated a legacy security gap where a MySQL database on EKS was exposed via NLB (ap-northeast-1); executed recovery using binary logs and EBS snapshots, then hardened the environment with ClusterIP conversion and Security Group lockdown.
- Build and maintain Helm charts for all microservices deployments, standardizing deployment patterns across the organization.
- Automate Windows Server configuration using Ansible + AWS SSM for hybrid infrastructure management.

- Develop infrastructure-as-code automation with a custom aws-ops/ project featuring three-tier permission model, auto-discovery scripts, and MCP integrations (GitLab, Google Docs, DBHub for MySQL).
- Mentor junior DevOps team members, lead reviews on infrastructure and pipeline changes, and help establish CI/CD and GitOps standards across the organization.
- **Shift-Left Security:** Integrated SonarQube (SAST), Snyk (SCA), and Trivy (container image scanning) into CI/CD pipelines with automated gates for critical findings; configured Gitleaks in pre-commit hooks and CI stages; applied OWASP Top 10 awareness when reviewing pipeline configurations and deployment patterns.
- **Full-Stack:** Led CRA-to-Next.js 14 migration for INFAXIA/MGA gaming platform (Web3Auth, MetaMask, WalletConnect, ethers, Redux with 14 slices, styled-components, antd v4); co-developed BibleQuiz — non-profit Vietnamese Bible quiz app (Java 17 + Spring Boot 3.3 + React 18 + Vite 5 + TypeScript, ~75 endpoints, ~30 DB tables, ~370 tests).

DevOps Engineer · Rikkei Software

Da Nang, Vietnam 02/2024 – 07/2024

- **SMP** · *Microservice Platform · 70+ team · Java/Python/ReactJS*
- Consulted and designed architectural solutions for multi-environment deployment strategies (on-prem and Alibaba Cloud).
- Provisioned and managed Kubernetes clusters, storage providers, and configured Jenkins on K8s, Nexus, SonarQube, ArgoCD, Prometheus, Grafana, and ELK stack.
- Authored Dockerfiles for all services and created standardized Helm charts for Kubernetes deployments.
- Set up MongoDB replica sets on VMs, MySQL databases, and Alibaba Container Kubernetes with GitLab CI pipelines.
- Developed Jenkins shared libraries to standardize build/deploy workflows across the 70+ member team.

DevOps Engineer · Synodus

Ha Noi, Vietnam (Onsite) 12/2022 – 01/2024

- **XECA** · *Logistics Platform · 35+ garages · GCP/GKE*
- Provisioned GKE clusters, Pub/Sub messaging, and MariaDB infrastructure using Terraform.
- Set up Jenkins on GKE with cloud agents (Linux/Windows), developed shared libraries and Helm charts for all services.
- Built end-to-end CI/CD pipelines: code scanning, image building, and ArgoCD-based deployment to GKE.
- Configured Vault for secrets management, set up DNS, Ingress controller, and backend configurations.
- Identified and resolved performance bottlenecks, achieving 20% performance improvement and 15% downtime reduction.
- **BANCA** · *Blockchain Platform · 25+ microservices · Azure/AKS*
- Architected server infrastructure and provisioned AKS clusters, PostgreSQL Flexible Server using Terraform.
- Configured HashiCorp Vault for secrets management and ArgoCD for GitOps-based deployments on AKS.
- Created Helm charts for all 25+ microservices and built CI/CD pipelines with Azure DevOps.
- Deployed full observability stack: ELK for logging, Prometheus + Grafana for monitoring and alerting.
- Implemented OWASP-aligned security scanning in Azure DevOps pipelines: SonarQube SAST, Snyk for dependency vulnerabilities, and container image scanning before registry push.
- Enforced network policies and pod security standards on AKS to meet blockchain compliance requirements.
- **CLEO** · *Fintech Platform · Bank/VNPAY/Momo integrations · AWS*
- Designed and deployed complex AWS architectures using Terraform: EC2, ECS, Lambda, VPC, WAF, with multi-account governance via AWS Control Tower.
- Built multi-environment CI/CD pipelines using AWS CodePipeline and CodeDeploy with automated rollback strategies.
- Implemented comprehensive monitoring with CloudWatch, CloudTrail audit logging, and custom alerting for compliance.

- Managed RDS databases with automated backup/recovery strategies, Redis caching layer, and SQS/SNS messaging infrastructure.

▸ **DTC** · *Government · Vietnam Ministry of Finance · Windows/SharePoint*

- Designed architectural solutions for high-security government infrastructure on Windows Server platform.
- Installed and configured SharePoint Server 2019 multi-server farm, SQL Server Always-On clusters, and IIS.
- Built Jenkins CI/CD pipelines for .NET applications with SonarQube integration and automated deployment to SharePoint/IIS.
- Developed backup/recovery procedures reducing data loss risk and improving system recovery time.

DevOps Engineer · FPT Software

Da Nang, Vietnam 01/2021 – 12/2022

Large-scale US banking platform serving 200K+ customers. 150+ VMs, 100+ K8s nodes with auto-scaling (90→150 nodes). Multi-team (70+) across global locations.

- Created Salt Stack configuration management for Zookeeper, HBase, Hadoop, Tomcat, MongoDB, Elasticsearch, and Filebeat.
- Provisioned cloud resources using Terraform across AWS and GCP environments.
- Set up and maintained technology stack: Jenkins, Nexus/JFrog, SonarQube, ELK, Prometheus, Grafana.
- Automated build/test/deploy processes with Jenkinsfiles and wrote Helm charts for Kubernetes workloads.
- Troubleshot complex production issues across EKS, WAF, SQS, SNS, ECS, and AWS networking components.
- Ensured zero-downtime during peak-hour scaling events (90 to 150+ nodes).

Software Developer · Freelance / Various Projects

Da Nang, Vietnam 2019 – 2020

- Developed web applications using Java, Spring Boot, Angular, and JavaScript.
- Built REST APIs and integrated with MySQL, PostgreSQL databases.
- Contributed to frontend development with HTML, CSS, JavaScript, and Bootstrap.
- Gained foundational understanding of deployment workflows that led to transition into DevOps engineering.

EDUCATION

Bachelor of Engineering · Da Nang University of Science and Technology

Da Nang, Vietnam 2012 – 2017

CONTINUOUS LEARNING & PROFESSIONAL DEVELOPMENT

- Currently pursuing AWS Solutions Architect – Associate and Certified Kubernetes Administrator (CKA).
- Hands-on practitioner of OpenTelemetry observability: SLO/error-budget design and burn-rate alerting strategies.
- Active adopter of AI-assisted development workflows (Claude Code, MCP integrations) for infrastructure automation.
- Applied DevSecOps practices in production pipelines (SonarQube, Snyk, Trivy, Gitleaks) with OWASP Top 10 awareness.

KEY STRENGTHS

- Managing 20+ concurrent production projects across AWS infrastructure with responsibility for availability, CI/CD, and observability.
- Incident response: identified and remediated a production security exposure on MySQL database, executing recovery and defense-in-depth hardening with no data loss.
- Shift-left security: integrated SAST (SonarQube), SCA (Snyk), container scanning (Trivy), and secrets detection (Gitleaks) into CI/CD pipelines.
- Standardized GitOps workflows organization-wide using ArgoCD + Helm chart patterns.

- Built custom infrastructure automation toolkit (aws-ops) to streamline multi-account AWS operations.
- Cross-functional contributor: shipped production code on both frontend (Next.js/React) and backend (Java/Spring Boot) projects alongside DevOps responsibilities.

LANGUAGES

Vietnamese: Native · English: Intermediate — proficient in technical reading and writing; developing verbal communication
